

ANGU ABISHEK

Electronics & AI Engineer

Dindigul, Tamil Nadu | 8220335091 | anguabishek183@gmail.com | [linkedin.com/in/anguabishek-m](https://www.linkedin.com/in/anguabishek-m) | github.com/anguabishek17

PROFESSIONAL SUMMARY

Electronics and Communication Engineering student specializing in embedded AI and full-stack development, with hands-on experience across computer vision, agentic AI, and production engineering at UNO MINDA. Proficient in Python, TensorFlow, PyTorch, React, Node.js, and embedded hardware. Seeking an Electronics and AI Engineering role to design and build intelligent, hardware-integrated systems.

SKILLS

Programming and AI/ML: Python, TensorFlow, PyTorch, Keras, OpenCV, Scikit-learn, MATLAB

Web and Database: React.js, Node.js, Express.js, Flask, MySQL, MongoDB, Firebase, REST API, FastAPI

Hardware and Embedded: Raspberry Pi, Embedded C, Microcontrollers (Arduino, ESP32), Sensor Integration, Circuit Design

Tools and Deployment: Git, GitHub, VS Code, Jupyter Notebook, Docker, AWS (EC2, S3, Amplify), Render, Vercel

Soft Skills: Problem Solving, Cross-Functional Collaboration, Technical Communication, Project Management, Critical Thinking, Adaptability

WORK EXPERIENCE

Production Development Intern — UNO MINDA, Seating Division, Plant 2, Hosur

2025 – Present

- Collaborated with production and quality engineering teams to analyze end-to-end seat manufacturing workflows and identify process inefficiencies.
- Documented and digitized standard operating procedures for multiple production machines, improving reference accessibility and reducing manual lookup time for line technicians.
- Supported root-cause analysis on production line defects with quality control engineers, contributing to corrective-action discussions aimed at reducing rework and scrap rate.
- Gained hands-on exposure to automation and sensor-based quality inspection systems on the assembly line, assisting in evaluating their integration into existing workflows.
- Partnered cross-functionally with production, quality, and safety teams to present process observations and translate engineering data into actionable recommendations.

CMMS – Titan Cloud — Case Maintenance Intern

June 2025

- Worked with the Computerized Maintenance Management System (Titan Cloud). Assisted in maintenance operations and record management.

EDUCATION

B.E., Electronics and Communication Engineering: VSB Engineering College, Karur | Sep 2024 – May 2028 | **CGPA: 8.54/10**

Higher Secondary (Class XII): Sri Chaitanya Techno School, Hosur | 2023 – 2024 | **Score: 68.5%**

TECHNICAL PROJECTS

- RESTORE AI – AI-Based Image Restoration for Semiconductor Inspection:** Designed and developed a GAN/autoencoder restoration pipeline in Python, PyTorch, TensorFlow, and OpenCV; integrated a fine-tuned SwinIR model that improved PSNR/SSIM image quality and reduced false negatives in simulated defect inspection.
- MAITRI – AI-Based Physical Wellbeing Assistant for Astronauts:** Designed an ML-based anomaly detection architecture for physiological trend monitoring using Python and TensorFlow/Scikit-learn; developed a data pipeline integrating simulated sensor input to power real-time health alerting.
- SPAMSENSE AI – Agentic AI-Based Spam Mail Detection System:** Designed and developed a multi-step agentic pipeline in Python; integrated LangChain and LLM APIs to autonomously evaluate email content and context for adaptive spam classification.
- UNOMINDA – Industrial Machine Instruction Portal:** Designed and developed a full-stack SOP portal using React.js, Node.js, and MySQL; integrated a REST API layer to replace manual instruction lookup with searchable digital access for technicians.
- HOSTEL CARE – Hostel Complaint Management System:** Designed and developed a full-stack complaint tracking application using React.js and Node.js; integrated MySQL/Firebase to digitize the complaint-to-resolution workflow for students and admins.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services, 2025
- TensorFlow Developer Certificate — Google/TensorFlow, 2025
- NPTEL – Embedded Systems Design — IIT (NPTEL), 2025
